About Blauberg Group	2
KRR series	4
AR series	9

Blauberg Group manufactures and sells a complete range of hi-tech energy-efficient ventilation equipment offering a balanced mix of innovative technology, contemporary design and traditional German quality.

The group's main products include domestic fans, single-room ventilation units, heat recovery units, industrial fans and air handling units, parts and accessories for customized system configurations as well as bespoke ventilation solutions.

Due to our product diversity, we do our best to meet the individual needs of our clients in various countries with the best combination of price and quality.

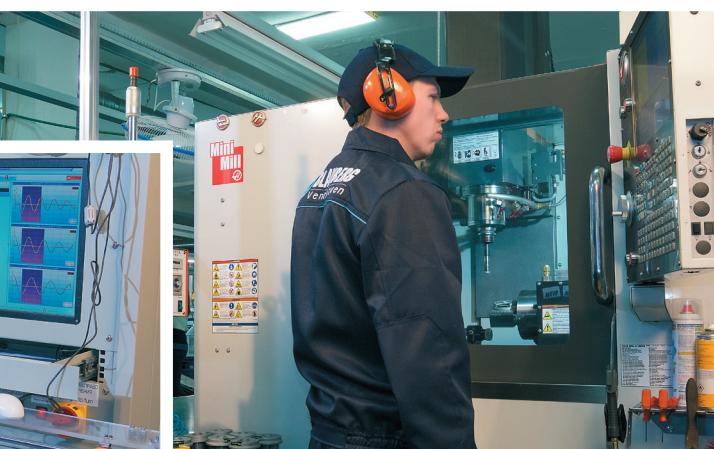

Blauberg Motoren was born in Munich, Germany, like own direction of fans and motors manufacturing and integral part of Blauberg Group.

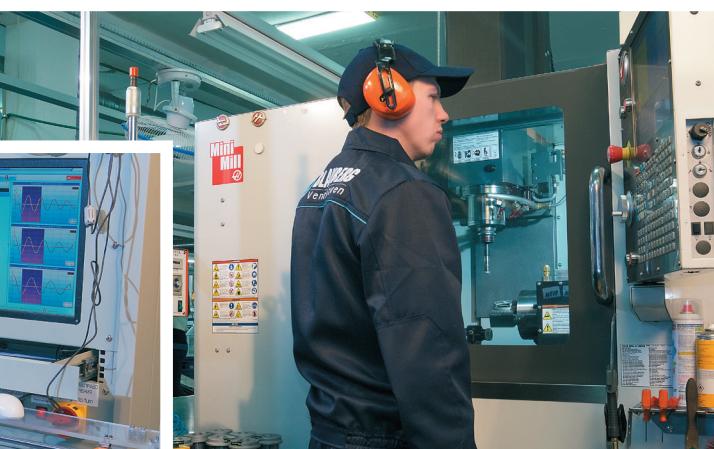

Starting with manufacturing AC motors with external rotors for own needs, for now Blauberg Motoren produce wide range of motors and fans with EC and AC technology for clients all around the world. It includes axial fans, backward curved fans, forward curved fans, blowers.

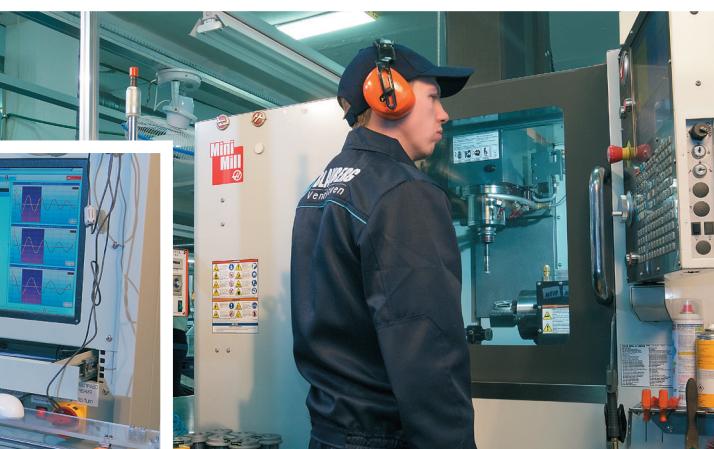

We are proud to be presented in products of our clients – world famous manufactures of ventilation, heat, home appliance and other equipment, and be part of their success.

For now Blauberg Motoren have R&D (research and development) center in Munich (Germany), as well as main testing laboratories for products and factories in Germany (Munich), Ukraine (Kiev) and Poland.

Every day we are working with our passion and respect to technology and engineering to make our products better – more responsive to needs and expectations of our clients.

With traditional German quality, we are focused on developing and improving best one and newest technology – in our own manufacturing and in our products.

WE ARE CLIENT-ORIENTED COMPANY AND TRY TO BE BEST ONE FOR OUR CLIENTS IN SEGMENTS WE ARE PRESENT.

CENTRIFUGAL IMPELLER

KRR SERIES

Use

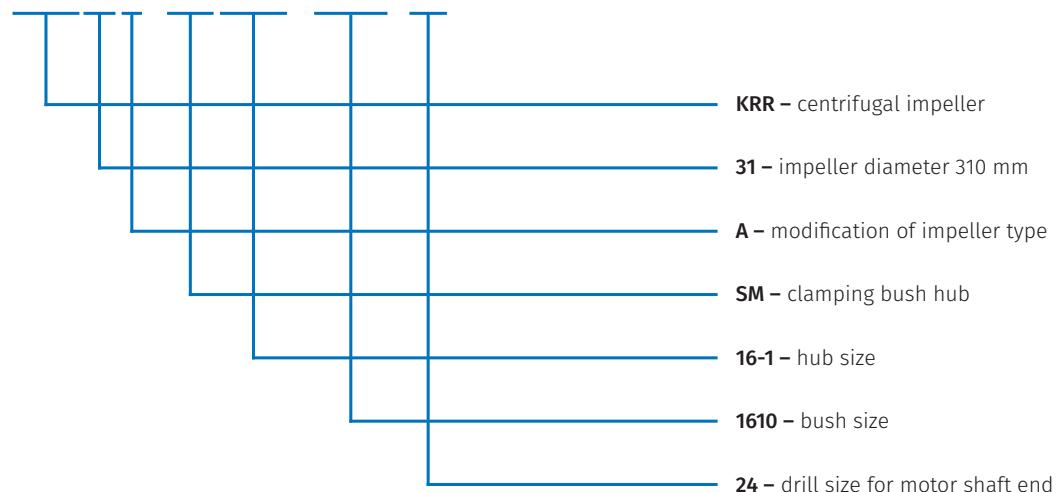

- HVAC
- Central air conditioners
- Air handling units (AHU)
- Plug fans
- Used as a free impeller
- The impellers are compatible with various AC/EC motors 50/60 Hz

Description

- Size: 310–800 mm
- Material: steel
- Coatings: RAL 5007. Cover type: GL
- Number of blades: 7
- Designed for continuous operation S1
- Fitting position: horizontal or vertical
- Contents of delivery:
 - inlet ring with the ability to measure volumetric flow;
 - screwed hub;
 - clamping sleeve for a specific motor shaft
- Min./Max. permissible ambient impeller temperature (transportable / storage): -40...+80 °C
- Min. ambient temperature: -20 °C
- Max. ambient temperature: +80 °C

VENTILATION UNITS

AR SERIES

Designation key
AR31-2DN-1.1

- A – ventilation unit
- R – type of impeller series KRR (steel)
- 31 – impeller diameter 310 mm
- 2 – number of poles (2/4/6/8)
- D – 400 V 50 Hz (three-phase motor)
- N – standard motor IEC standard
- 1.1 – motor power (kW)

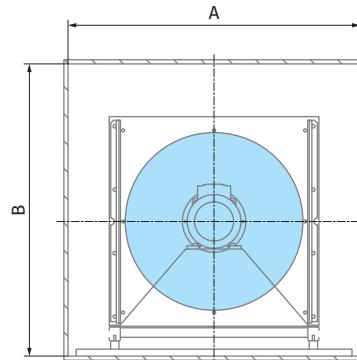

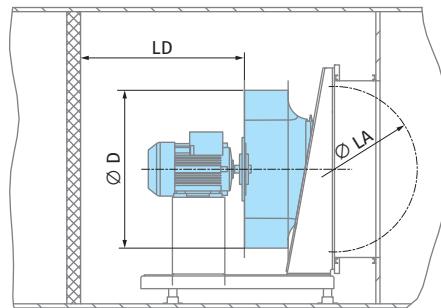

Electrical connection diagram
TYPE D

VENTILATION UNITS

AR SERIES

Mounting

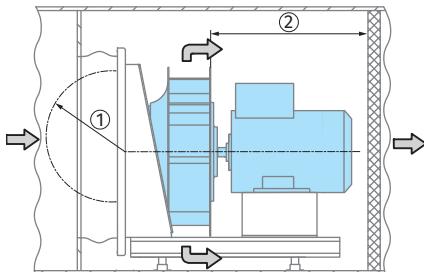

RECOMMENDATIONS FOR PLACING THE VENTILATION UNIT RELATIVE TO OTHER STRUCTURAL ELEMENTS

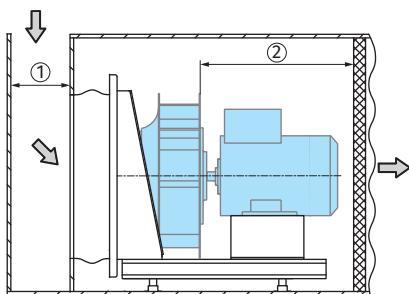

- Impeller outer diameter: Ø D
- Intake side distance: $\text{LA} \geq 0.5\text{D}$.
- In case of flow disturbance (e.g. bent air duct on the intake or damper side, etc.) $\text{LA} \geq \text{D}$.
- Pressure side distance: $\text{LD} \geq \text{D}$
- Distance from the casing wall: $\text{A} = \text{B} = 1.8\text{D}$

Below are general recommendations for placing the ventilation units based on experience of their application.

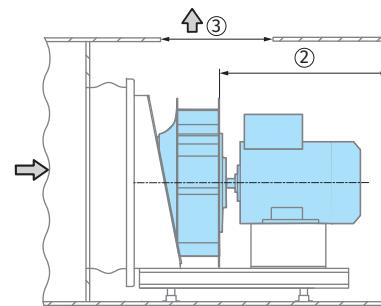

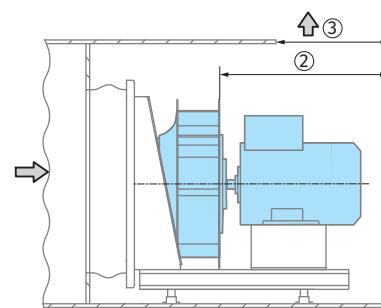

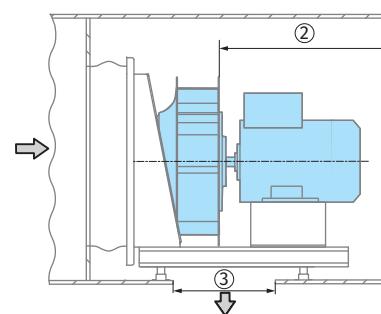

- Air flow capacity of a ventilation unit depends on the distance between the structural elements on the intake side "1" and the pressure side "2".
- On the intake side "1" $\geq 0.5\text{D}$.
- On the pressure side, the optimal value is "2" $\geq 1\text{D}$, the minimum value is "2" $\geq 0.7\text{D}$ (except when a cooling device or a humidifier is located after the unit).

- Changes in flow direction prior to the ventilation unit cause significant turbulence in the intake area.
- Intake side "1" $\geq 1\text{D}$, when using guide elements to suppress turbulence, this value can be reduced to "1" 0.7D , otherwise noise and power loss will increase.

- The position of the opening can be above or below the ventilation unit – dimension "3" $\geq 0.8\text{D}$.
- The preferred design is that the opening extends the full width of the unit

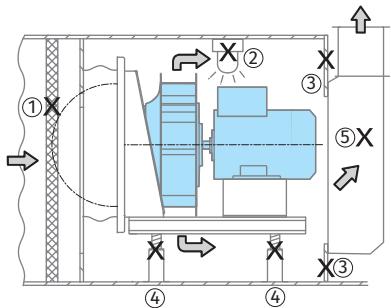

VENTILATION UNITS

AR SERIES

POSSIBLE CAUSES OF DECREASED OPERATION EFFICIENCY

- an obstruction on the intake side (e.g. heat exchanger too close) "1";
- obstruction on the pressure side (e.g. long fluorescent lamp) "2";
- air duct narrowing at outlet "3";
- obstruction on the pressure side (high lower supports) "4";
- flow direction change by 90° and reduction of cross-section "5"

RECOMMENDATIONS FOR THE LOCATION OF THE CONNECTING CABLE AND THE DISTRIBUTION BOX

- In harsh environments (e.g. wet rooms, outdoor installation), all connections must be routed with due consideration of water run-off direction. In order to prevent water ingress to the controller or motor housing through the connections, the terminal box must be installed below the motor.

AR56-4DN-11	400	50	1460	2310	11	21.5	109	-20...+40	Type "D"/p. 5

Overall dimensions [mm]

Model	L	L1	L2	L3	Weight [kg]
AR56-6DN-1.5	720	675.5	576	43	75.3
AR56-4DN-2.2	720	675.5	576	43	76.3
AR56-4DN-3	720	675.5	590	43	80.3
AR56-4DN-4	720	700.5	626	43	86.4
AR56-4DN-5.5	880	745.5	700	43	104.4
AR56-4DN-7.5	880	758.5	682	72	117
AR56-4DN-11	880	858.5	744	100	157.4

Ø 630 MM, BACKWARD CURVED

AR SERIES

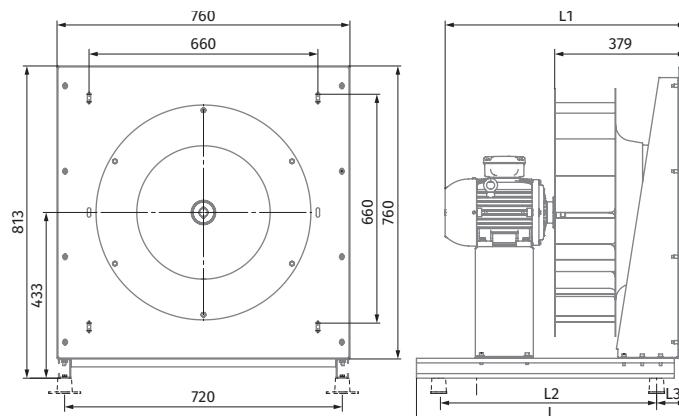

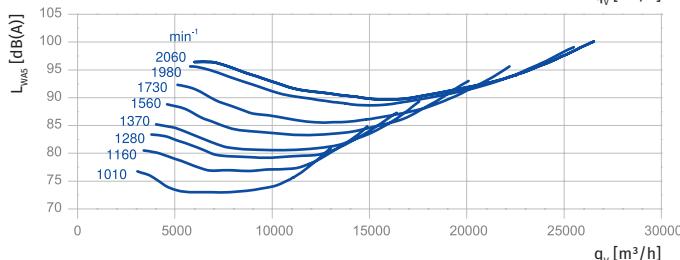

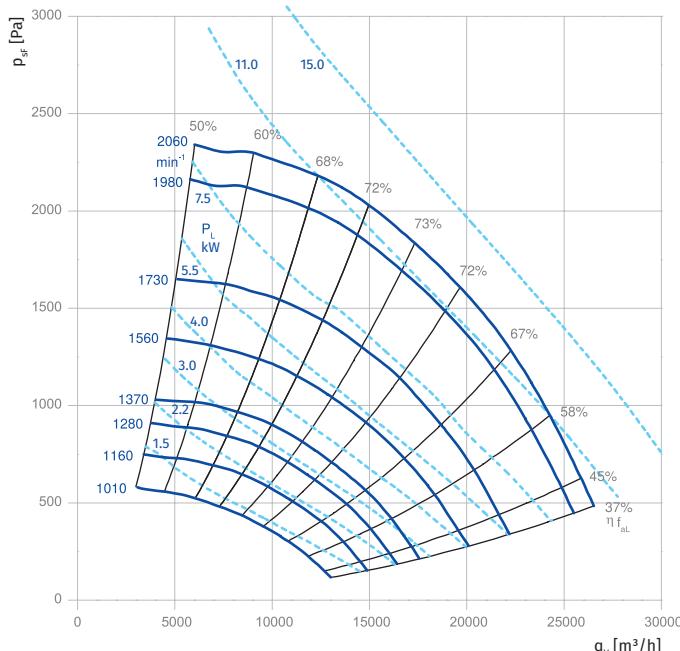

Features

- Materials:
Impeller – welded sheet steel
Frame – aluminium
Terminal box – aluminium
- Direction of rotation:
clockwise
- Type of protection:
IP55
- Insulation class:
155(F) to 130(B)
- Mode of operation:
S1
- Bearing:
preloaded bearing DE
- Motor protection:
(A) without (Standard)

Technical data

Model	Nominal voltage [VAC]	Frequency [Hz]	Speed n_N [RPM]	Speed n_{max} [RPM]	Power [kW]	Current [A]	Sound pressure level [dBA]	Permanent ambient temperature [°C]	Electrical connection
AR63-6DN-1.5	400	50	925	1020	1.5	3.9	85	-20...+40	Type "D"/p. 5
